**Job Description**

NIH-funded Postdoctoral Associate position is available to study Tissue Homeostasis and Regeneration in salivary and lacrimal glands in the laboratory of Dr. Catherine Ovitt, Professor in the Department of Biomedical Genetics, in the Center of Oral Biology at the University of Rochester School of Medicine and Dentistry. <https://www.urmc.rochester.edu/labs/ovitt.aspx>

Current research projects include:

- The molecular and cellular basis of radiation damage and radioprotective strategies for the salivary glands;
- Development of a bioengineered tissue chip for in vitro drug screening of salivary gland cells;
- Mechanisms and strategies for salivary gland regeneration.

Applicants must hold a Ph.D. in Cell and/or Molecular Biology, and have a strong publication record.

Downloaded On: Mar. 30, 2020 9:31pm

Posted Jan. 6, 2020, set to expire May 7, 2020

Applicants must have working experience in genetics, mouse models, stem cells, developmental biology, and molecular biology, as demonstrated through publications. Applicants must speak English fluently, and have previous training in statistical analysis. Applicants should submit a combined PDF of their CV, a one-page statement of (a) research accomplishments and (b) specific reasons for interest in the research topics of this advertised position, as well as copies of major publications.

Applications should also include a cover letter, and contact information for three references. Submit to: Dr. Catherine Ovitt, [Catherine\\_ovitt@urmc.rochester.edu](mailto:Catherine_ovitt@urmc.rochester.edu)

EOE Minorities/Females/Protected Veterans/Disabled

### **EEO/AA Policy**

The University of Rochester is an Equal Opportunity Employer and has a strong commitment to diversity; it actively encourages applications from groups underrepresented in higher education.
