Position Summary:

Under the direction of the hazardous materials specialist, this position will assist in managing the university's hazardous waste and used oil programs, including interpreting state and federal laws and regulations relating to hazardous waste management; providing assistance in the handling, use, storage, and characteristics of hazardous materials, maintaining compliance with procedures for collecting, preparing for transport, and disposal of hazardous materials; and responding to emergencies involving hazardous materials in a timely manner.

This is an essential position that will be called upon in the event of an emergency and/or university closure.

Minimum Qualifications:

Bachelors degree in chemistry (preferred) or in a scientific discipline with a minimum of 10 hours in chemistry.

Minimum of 2 years of work experience in hazardous waste handling operations (a masters degree or higher in chemistry may be substituted for 2 years work experience in hazardous waste handling operations.)

Completion of an EPA/OSHA approved 40-hour hazardous waste operations/emergency response training course and/or DOT Hazmat Employee Training Course (Must be completed within 6 months of date hired.)

Preferred Qualifications:

Masters degree in chemistry (preferred) or in a scientific discipline with a minimum of 30 hours in chemistry.

Two or more years of work experience in hazardous waste handling operations.

Experience in hazardous waste handling operations in an institution of higher education.

Experience responding to emergency situations.

Good knowledge of:

Principles and analytical techniques used in chemistry;
