Job Title	Postdoctoral Research Position in Tissue Engineering and Regenerative Medicine
Department	Department of Bioengineering
Institution	University of Illinois at Chicago Chicago, Illinois
Date Posted	Jun. 19, 2020
Application Deadline	Open until filled
Position Start Date	Available Immediately
Job Categories	Post-Doc
Academic Field(s)	Biomedical Sciences
Apply By Email	ealsberg@uic.edu

Job Description

Description:

Highly motivated individuals are encouraged to apply for a Postdoctoral Research Associate position in the Department of Bioengineering at the University of Illinois at Chicago (UIC). Our laboratory has relocated to a beautiful newly renovated facility at UIC in January of 2019. Our work focuses on engineering functional biologic replacements to repair damaged or diseased tissues in the body. We use the complex signals that are implicated in tissue morphogenesis, repair, and homeostasis as a template for the development of new strategies and biomaterials for tissue regeneration. Through the precise temporal and spatial presentation of soluble bioactive factors, mechanical forces, and biomaterial physical and biochemical properties, we aspire to create microenvironments that regulate cell gene expression and new tissue formation. The positions are available immediately with a competitive salary. Interested candidates should send a cover letter, their CV, and the names and contact information of three references electronically to the email address given below.

Qualifications:

Applicants should hold or be about to complete a PhD or MD/PhD in biomedical engineering, materials science and engineering, chemistry, developmental, cell or molecular biology, or related field. A highly

motivated candidate is sought with an experimental background, a strong academic and publication record, and the ability to work independently and on team research. Experience with stem cell biology and or organoid culture, molecular and cell biology techniques, and/or polymer synthesis and characterization is highly desirable. Strong written and verbal communication skills are critical. Applicants will work in a multidisciplinary tissue engineering laboratory comprised of postdoctoral fellows, graduate students, and undergraduate students.

EEO/AA Policy

The University of Illinois at Chicago is an equal opportunity employer. Women and minority candidates are strongly encouraged to apply.
