Job Description	

The Yan Research Group at the University of North Carolina at Chapel Hill is seeking a postdoctoral scholar with expertise in heterogeneous catalysis via photochemical or photo-electrochemical reactions on nanomaterials, especially photocatalytic conversion of methane and carbon dioxide to value-added chemicals. Strong candidates in the fields of nanophotonics or biophotonics will also be considered. The candidate should have a Ph.D. degree in materials science, chemistry, or other related subjects, conferred within the last four years or to be conferred by August 2021. The successful candidate would have a strong publication record and good writing and communication skills. The postdoctoral research will start from September 2021 but can be earlier. For more information, please visit <https://yan.web.unc.edu/>
