**Apply By Email**

**Job Description**

The Department of Biological Sciences invites applications for a Postdoctoral Research Associate in the field of genetics and stress biology. The research involves use of genetic tools, cellular analysis, and transcriptomic/gene expression approaches to study stress responses. Example research of interest includes use of model systems relevant to human disease states such as diabetes and ischemia. Candidates should demonstrate the potential to develop a research area, with the capacity to work with a broad range of team members including those in the field of physiology, biochemistry, and bioinformatics.
