Emitting Molecular Strings and Coils" (Award # 2155153).

The responsibilities for this position include the preparation and characterization of target organic compounds, highly air-sensitive organometallic species, and novel transition metal complexes. We offer a well-equipped laboratory, a recently upgraded infrastructure for NMR and emission spectroscopy, as well as a brand-new XRD facility.

Applicants must hold a postgraduate degree at PhD level (or any other equivalent foreign degree) in inorganic/organometallic synthesis and spectroscopy. The ideal candidate needs to be well-trained in manipulating highly air-sensitive compounds (Schlenk techniques) and also has substantial experience in X-ray crystallography or computational chemistry.

This position is available immediately, with the possibility of extension. Applications including a letter of motivation, detailed CV, and the contact information of at least two professional references two letters of recommendation should be submitted here (Job ID 246461).

For further information please visit our website and contact Professor Stollenz (michael.stollenz@kennesaw.edu).
