Job Description

The [Department of Geology](#), University at Buffalo, The State University of New York seeks a Solid-Earth Geophysicist who uses geophysical methods to study lithospheric processes, such as earthquake and volcanic hazards, tectonic processes at active plate boundaries, or glacial isostatic adjustment, and to interrogate Earth's interior structure as it pertains to hazards. (Associate or Full Professor).

Selected candidates will teach courses at the graduate and undergraduate levels, mentor graduate students, and maintain an active externally funded research program that will complement existing

Departmental strengths in water and the environment, polar climate-change, volcanology and geodynamics. Additionally, the selected candidates could align their research with an expanding focus of UB's Center for Geological and Climate Hazards, which facilitates interdisciplinary research across campus and builds on recent and ongoing hires in natural hazards. Inquiries should be made to Prof. Bea Csatho (bcsatho@buffalo.edu).

Outstanding Benefits Package
