Job Description	

Overview

The mission of the Nutrition and Vision Research Laboratory (LNVR) is to discover mechanisms of aging in the eye and seek nutritional and other means to delay age-related vision impairments.

What You'll Do

Under close supervision of Principal Investigator and other lab members, the technician conducts a variety of routine experiments following established procedures and protocols, which may include monitoring and feeding laboratory animals, performing assays, tissue culture, electrophoresis, and other laboratory techniques. Will also record test results, analyze data using basic statistics, maintain laboratory equipment and supplies. The technician may also be called upon to adapt new assays as
