environmental processes and harnessing the power of microbial biofilms to address environmental issues.

The EMBB research group is looking for a highly motivated Project Officer (PO) with an interest in biofilm engineering. The PO will work on a project aiming to understand how biofilms respond to environmental stimuli and use the insights to develop approaches for biofilm engineering.

**Key Responsibilities:**

- Rigorously design and perform experiments.
- Perform in-depth, critical data analyses.
- Effectively communicate through presentations and high-quality journal publications.
- Assist in supervising research students in the group.

**Job Requirements:**

- Bachelors of Science or Bachelors of Engineering in environmental microbiology, microbial biotechnology, or a related field.
- Hands-on experience on bacterial biofilms.
- A strong interest in interdisciplinary research.
-
