### What You'll Do

Under close supervision of Principal Investigator, conducts a variety of experiments following established procedures and protocols, including tissue culture, characterization of malaria proteins in human red blood cells, immunoprecipitation, immunofluorescence, CRISPR-Cas9 editing, and biochemical interactions with endothelial cells. May also record test results, data analysis using appropriate statistical software, and maintain laboratory equipment.

- Conducts bench research experiments following appropriate protocols and procedures to achieve results
- Performs techniques such as tissue culture, PCR, immunohistochemistry, electrophoresis, protein purification, immunoprecipitation, immunofluorescence, CRISPR-Cas9 editing.
- Records results and maintains accurate records of experiments
- Performs limited data interpretation and assists with basic statistics and analysis
- Maintains laboratory equipment and orders/keeps inventory of supplies
- Prepares stock solutions, reagents and other media
- If necessary, test the role of malaria proteins as potential vaccine candidates using mouse models.

### What We're Looking For

#### Basic Requirements:

- Bachelor's degree in science with up to one year laboratory experience

#### Preferred Qualifications:

- Familiarity with laboratory techniques and procedures, including malaria parasite tissue culture, PCR, and basic understanding of gene editing technology.
