helps manage laboratory operations.

- Conducts specialized laboratory experiments
- Performs advanced procedures such as DNA sequencing and molecular biology techniques
- Develops research study design, techniques and protocols in collaboration with Principal Investigator
- Reviews results and suggests modifications to experiments and protocols where necessary
- Oversees collection and data entry of results
- Analyzes and interprets data and drafts results of experiments
- Writes summaries and material for presentation and publication

What We're Looking For

Basic Requirements:

- Bachelor's degree in science and 3-5 years of related laboratory experience OR Master's degree and up to one year laboratory experience

Preferred Qualifications:

- Master's degree in science
- Knowledge of and experience with advanced laboratory techniques and procedures, data interpretation and statistical analysis

Pay Range

Minimum \$48,500.00, Midpoint \$60,750.00, Maximum \$73,000.00

Salary is based on related experience, expertise, and internal equity; generally, new hires can expect pay between the minimum and midpoint of the range.
