Job Description

The School of Mechanical and Aerospace Engineering (MAE) is one of the top 12 mechanical and aerospace engineering schools in the world. With well-established industry partnerships, MAE provides an active and vibrant research environment with excellent R&D infrastructure and numerous opportunities for research funding. The school has an enrolment of over 2500 undergraduate students with over 90 faculty members and 140 full-time research staff working in well-equipped state-of-the-art

laboratories. A growing research student population of over 400 is also actively engaged in strategic research and development work.

We invite highly qualified candidates in the following expertise areas to join our dynamic team of faculty.

- Mechanical Engineering

Candidate Profile:

- Possess relevant Bachelor and PhD degrees from reputable universities.
- A good research track record and postdoctoral experience would be advantageous.
- Research intersects the multidisciplinary field of sustainable manufacturing and automation with transport phenomena, as well as thermal and fluids engineering.
- Thermal and fluid sciences are applied to various areas of interest, including but not limited to artificial intelligence, sustainable energy systems, materials processing and additive manufacturing.
- Demonstrate specialization in experimental methodologies, computational analysis/simulation and sustainable manufacturing.

Successful candidates are expected to teach at both undergraduate and graduate levels, supervise graduate students and undergraduate projects. Candidates on tenure-track would also be expected to acquire research funding and conduct research.

We Provide:

- An active and vibrant research environment
-
