Job Description	

The School of Mechanical and Aerospace Engineering (MAE) is one of the top 12 mechanical and aerospace engineering schools in the world. With well-established industry partnerships, MAE provides an active and vibrant research environment with excellent R&D infrastructure and numerous opportunities for research funding. The school has an enrolment of over 2500 undergraduate students with over 90 faculty members and 140 full-time research staff working in well-equipped state-of-the-art laboratories. A growing research student population of over 400 is also actively engaged in strategic

research and development work.

We invite highly qualified candidates in the following expertise areas to join our dynamic team of faculty.

- Robotics

Candidate Profile:

- Possess relevant Bachelor and PhD degrees from reputable universities.
- A good research track record, and postdoctoral experience would be advantageous, especially in human-robot interaction domain, including robot hardware component and system, manipulation and planning, and AI techniques.
- Solid background in robotics modeling, simulation, and algorithmic robotics.
- Have strong hands-on experimental methodologies for Human-robot interaction, system design, and implementation.
- The ability to develop and conduct an effective experimental, computational/numerical research program for industrial and healthcare applications is expected.

Successful candidates are expected to teach at both undergraduate and graduate levels, supervise graduate students and undergraduate projects. Candidates on tenure-track would also be expected to acquire research funding and conduct research.

We Provide:

- An active and vibrant research environment

-
