## About the Office of Electricity

The mission of the Office of Electricity is to lead the Department of Energy's research, development, and demonstration programs to strengthen and modernize our nation's power grid so that our nation maintains a reliable, resilient, and secure electricity delivery infrastructure. OE's vision includes working closely with industry and other stakeholders, we drive technological and operational advancements that ensure that every American home and business has reliable access to affordable energy, and that the U.S. sustains its global leadership in clean energy transformation.

### *About the OE Grid Controls and Communications Division*

The Grid Controls and Communications (GCC) Division manages research, development, and demonstration programs aimed at modernizing the Nation's electricity delivery system including secure communications, controls and protection systems. The Division is responsible for engineering end-to-end systems for communications, grid modeling, measurement and controls, and operations and planning.

## What will I be doing?

Fellows with the OE Grid Controls and Communications Team can expect:

- Learning to review projects for technical merit and insuring outcomes meet expectations, goals and impact.
- Participating in the technical development for workshops related to grid modernization including infrastructure interdependencies.
- Collaborating on written products, including reports, blog posts, technical bulletins or and peer reviewed papers.
- Providing research support for R&D roadmap development and quick-turn information requests.
- Participating in program support activities such as data collection, tracking, and technical
