<b>Job Title</b>	Research Assistant (Synthetic Biology & Enzyme Design)
<b>Department</b>	School of Biological Sciences
<b>Institution</b>	Nanyang Technological University Singapore, , Singapore
<b>Date Posted</b>	Feb. 20, 2025
<b>Application Deadline</b>	Open untill filled
<b>Position Start Date</b>	Available Immediately
<b>Job Categories</b>	Research Scientist/Associate
<b>Academic Field(s)</b>	Chemistry - Biochemistry
<b>Job Website</b>	<a href="https://ntu.wd3.myworkdayjobs.com/Careers/job/NTU-Main-Campus-Singapore/Research-Assistant--Synthetic-Biology---Enzyme-Design-_R00019854-1">https://ntu.wd3.myworkdayjobs.com/Careers/job/NTU-Main-Campus-Singapore/Research-Assistant--Synthetic-Biology---Enzyme-Design-_R00019854-1</a>

<b>Job Description</b>	

**Join Our Team at the School of Biological Sciences, Nanyang Technological University, Singapore**

The School of Biological Sciences (SBS), part of the College of Science, was established in 2002 with a mission to advance biological and biomedical sciences. At SBS, our research spans various areas,

## Research Assistant (Synthetic Biology & Enzyme Design) Nanyang Technological University

including infectious diseases, immunology, neurodegenerative diseases, telomere biology, and genome function. Over the years, SBS has attracted talented individuals from around the world and Singapore to join as scientific leaders and researchers.

For more details, please view <https://www.ntu.edu.sg/sbs>.

We are seeking a highly motivated Research Assistant (RA) to join our team in the field of synthetic biology and enzyme design. This position offers an exciting opportunity to contribute to cutting-edge research focused on developing novel biocatalysts and synthetic pathways. The ideal candidate should have a strong foundation in biochemistry or biology and a passion for scientific research.

### **Key Responsibilities:**

- Assist in the design and construction of synthetic biological systems and enzyme engineering projects.
- Perform molecular cloning experiments, including DNA manipulation, PCR, and gel electrophoresis.
- Support protein expression, purification, and characterization using standard biochemical techniques.
- Maintain cell cultures, troubleshoot experimental procedures, and ensure smooth lab operations.
- Analyze experimental data, maintain detailed records, and collaborate with team members to optimize research protocols.

**Research Assistant (Synthetic Biology & Enzyme Design)**  
**Nanyang Technological University**

**Job Requirements:**

- Bachelors degree in Biochemistry, Biology, Chemistry, or a related field.
- Basic knowledge of molecular cloning, protein expression, and purification (preferred but not required).
- Experience with PCR, gel electrophoresis, and DNA sequencing is advantageous.
- Strong problem-solving skills, attention to detail, and the ability to work both independently and collaboratively.
- Familiarity with enzyme assays, protein characterization methods (e.g., spectrophotometry, HPLC, SDS-PAGE), bacterial/yeast transformation, or synthetic biology tools is a plus.

This position offers an opportunity to work in a collaborative and innovative research environment, gaining hands-on experience with state-of-the-art techniques in synthetic biology and enzyme engineering. We provide professional development and training opportunities, along with a competitive salary and benefits package.

Interested candidates should submit the following documents:

- A cover letter detailing research interests and relevant experience.
- A current CV, including contact information for two references.
-
