Posting Detail Information

Position Summary

The [Pillon Lab](#) is seeking a **Research Technician III**. The lab's research program lies at the intersection of structural biology, biochemistry, molecular biology, and RNA biology. The candidate will be expected to coordinate with others in the laboratory to carry out experiments that require their experience and high level of training to include routine and advanced laboratory procedures such as biochemical preparations, molecular biology procedures, and cell culture. They will assist in the training of other technicians in the laboratory on processes and procedures necessary for the project.

Outstanding Benefits Package

Working at UB comes with benefits that exceed salary alone. There are personal rewards including comprehensive health and retirement plan options. We also focus on creating and sustaining a healthy mix of work, personal and academic pursuit - all in an effort to support your work-life effectiveness. We support your growth and development through our career coaching and training department and we qualify as a public service loan forgiveness organization. Learn more about the great [benefits](#) the University at Buffalo has to offer.

About The University at Buffalo

The University at Buffalo (UB) #ubuffalo is one of America's leading public research universities and a flagship of the State University of New York system, recognized for our excellence and our impact. UB is a premier, research-intensive public university dedicated to academic excellence. Our research, creative activity and people positively impact the world. Like the city we call home, UB is distinguished by a culture of resilient optimism, resourceful thinking and pragmatic dreaming that enables us to reach others every day. Visit our website to learn more about the [University at Buffalo](#).

As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicant's race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.

Minimum Qualifications

- Associates degree or higher college level courses in biological sciences (preferred) or equivalent.
- Four years of experience with biochemistry or equivalent laboratory work.
- Demonstrated working knowledge in operating experimental and unique equipment.
