Job Description

The School of Fisheries, Aquaculture, and Aquatic Sciences at Auburn University is seeking candidates for a Postdoctoral fellow to work both independently and collaboratively with members of a research team to develop research projects that further our understanding of the ecology of harmful algal blooms. The individual selected for this position will be expected to help identify relevant questions, design and implement field and lab experiments to test those questions, conduct statistical analyses of the results, publish manuscripts in scientific journals, present research findings at professional, stakeholder, and agency meetings, and prepare proposals for additional extramural funding of the research program. This is a benefit eligible, non-tenure track position. The appointment is for an initial period of one year with a possibility of continuance up to a maximum of four years depending on performance and funding availability.

The University: Auburn University is a Carnegie R1, land-grant institution organized into twelve academic colleges and schools. Auburn is ranked 47th among public universities in the 2023 U.S.
