Downloaded On: Apr. 11, 2025 11:53pm compensation that is higher than the published system will share at and step, are offered when necessary to meet competitive conditions.

Percent time: 100%

Anticipated start: Spring/Summer 2025

**Position duration:** One year with the possibility of extension based on performance and availability of funding.

#### Application Window Open date:April 1, 2025

**Next review date:** Wednesday, Apr 16, 2025 at 11:59pm (Pacific Time) Apply by this date to ensure full consideration by the committee.

**Final date:**Thursday, May 1, 2025 at 11:59pm (Pacific Time) Applications will continue to be accepted until this date, but those received after the review date will only be considered if the position has not yet been filled.

### **Position description**

The Department of Molecular and Cellular Biology at the University of California, Berkeley seeks applications for up to three Junior/Assistant/Associate/Full Specialist positions in the Upadhyayula Lab, in the area of Biological Science.

The Advanced Biolmaging Center (ABC) at UC Berkeley aspires to be a world leading multidisciplinary imaging center that drives important biological discoveries through critical new advances in all aspects of imaging technology and that drives the dissemination of that technology through a multi-pronged education strategy to scientists around the world. ABC was intentionally designed to maximize scientific productivity and impact by adopting groundbreaking imaging technologies such as the next-generation adaptive optical multifunctional microscope, incorporating the high-level technical expertise of instrumentation scientists , applied mathematicians, and computational scientists, and building worldwide collaborations aimed at tackling the challenges posed by terabyte and petabyte-scale imaging data processing, visualization, and dissemination. You will have access to leading - edge imaging and computing hardware, as well as exposure to the Bay Area's brightest minds from a range of diverse disciplines, including in the fields of Artificial Intelligence, Data Science, Mathematics, and more.

The positions involve close collaboration branch and point a many dependence of the many de

The duties of the positions include:

Operate and maintain the next generation multi-functional adaptive optical microscope(s) and other precommercial optical microscopes.

Develop new imaging and data processing tools

Assist with data acquisition using advance pre-commercial microscopy systems to image biological samples ranging from cells in culture, such as bacteria, mammalian cells, and organoids to intact organisms, such as zebrafish or mice, etc.

Be involved in the applications of these tools for biological imaging; collaborate with Postdocs and graduate students on specific projects to test, learn and implement for general and specific use cases. Be an integral part of the expert team working together with computational scientists and biologists in experimental design to tackle complex biological questions in a quantitative manner.

Train and assist students and researchers in the use of software applications

Train and assist users with their imaging or data processing tasks.

May supervise intern and/or undergraduate researchers.

General organization and management of software documentation.

### Qualifications

Basic qualifications (required at time of application)

Bachelor's degree (or equivalent international degree) or enrollment in a Bachelor's (or equivalent international degree) program.

Additional qualifications (required at time of start)

Bachelor's degree (or equivalent international degree)

### Preferred qualifications

Degree field of molecular & cell biology, computational biology, computer science, math, physics or

related field.

Research experience in computational biology, computer science, math, physics or related field. Experience with programming (C++, Labview, MATLAB, python).

Experience with design, documentation, testing and implementation of high performance software for image processing.

Experience with CI/CD for software deployment.

Experience developing software for tera-to petabyte scale imaging applications.

Ability to work on a number of projects simultaneously.

Organized and attentive to detail.

Strong written and oral communication skills.

Interest in learning new techniques.

Upper division course in genetics is strongly preferred.

Coursework in molecular biology and biochemistry.

Proficiency in bioinformatics.

Computational analysis of datasets.

Basic molecular biology techniques.

Ability to design and interpret experiments.

Ability to prepare figures for manuscripts.

Demonstrated proficiency to work as part of a research team.

### **Application Requirements**

### **Document requirements**

- Curriculum Vitae Your most recently updated C.V.
- Cover Letter
- Statement of Research (Optional)

### **Reference requirements**

• 3-5 required (contact information only)

About UC Berkeley

Direct Link: <u>https://www.AcademicKeys.com/r?job=255365</u> Downloaded On: Apr. 11, 2025 11:53pm Posted Apr. 3, 2025, set to expire May 2, 2025

UC Berkeley is committed to diversity, equity, inclusion, and belonging. The excellence of the institution requires an environment in which the diverse community of faculty, students, and staff are welcome and included. Successful candidates will demonstrate knowledge and skill related to ensuring equity and inclusion in the activities of their academic position (e.g., teaching, research, and service, as applicable).

The University of California, Berkeley is an Equal Opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, age, or protected veteran status.

Please refer to the <u>University of California's Affirmative Action and Nondiscrimination in Employment</u> <u>Policy</u> and the <u>University of California's Anti-Discrimination Policy</u>.

In searches when letters of reference are required all letters will be treated as confidential per University of California policy and California state law. Please refer potential referees, including when letters are provided via a third party (i.e., dossier service or career center), to the <u>UC Berkeley</u> statement of confidentiality prior to submitting their letter.

As a University employee, you will be required to comply with all applicable University policies and/or collective bargaining agreements, as may be amended from time to time. Federal, state, or local government directives may impose additional requirements.

As a condition of employment, the finalist will be required to disclose if they are subject to any final administrative or judicial decisions within the last seven years determining that they committed any misconduct, are currently being investigated for misconduct, left a position during an investigation for alleged misconduct, or have filed an appeal with a previous employer.

- "Misconduct" means any violation of the policies or laws governing conduct at the applicant's previous place of employment, including, but not limited to, violations of policies or laws prohibiting sexual harassment, sexual assault, or other forms of harassment, discrimination, dishonesty, or unethical conduct, as defined by the employer.
- UC Sexual Violence and Sexual Harassment Policy
- UC Anti-Discrimination Policy for Employees, Students and Third Parties
- APM 035: Affirmative Action and Nondiscrimination in Employment
