including infectious diseases, immunology, neurodegenerative diseases, telomere biology, and genome function. Over the years, SBS has attracted talented individuals from around the world and Singapore to join as scientific leaders and researchers.

For more details, please view <https://www.ntu.edu.sg/sbs>.

We are looking for a Research Assistant to support ongoing research in the area of phase separation in cell signaling. This role will involve investigating the molecular mechanisms and dynamics of phase-separated compartments and their function in cell signaling pathways.

Key Responsibilities:

- Perform cell biology and biochemistry experiments
- Conduct studies related to cell signaling and immune pathways
- Support lab operations and data analysis

Job Requirements:

- BSc (Hons) in Biological Sciences or a related discipline
- Background and/or interest in cell signaling, cell biology, or immunology
- Prior experience in molecular biology techniques is advantageous

The College of Science seeks a diverse and inclusive workforce and is committed to equality of opportunity. We welcome applications from all and recruit on the basis of merit, regardless of age, race, gender, religion, marital status and family responsibilities, or disability.

We regret that only shortlisted candidates will be notified.
