**Job Description**

## Postdoctoral Positions in Marine and Life Sciences, Shantou University

### A brief introduction of Shantou University

Shantou University (STU), founded in 1981, is a comprehensive university jointly supported by the Ministry of Education, Guangdong Provincial Government and Li Ka Shing Foundation. The main campus is located in the northwest of Shantou and covers a total area of 1.26 km<sup>2</sup>.

STU continues to expand its international influence and has been listed multiple times in the world's most authoritative university rankings, such as the Times Higher Education (THE) World University Rankings. In the 2024 world's university rankings, STU is ranked 52<sup>nd</sup> among the universities in mainland China. A total of 10 disciplines have entered the global top 1% of ESI, and some academic staff members have been selected into the World's Top 2% Scientists list by Stanford University. STU has established close academic exchanges and collaborations with 119 universities in 29 countries, including the United States, the United Kingdom, Canada, Ireland, France, Japan, Russia, Australia and Germany.

STU provides a variety of disciplines in a total of 14 schools/colleges, including the College of Science, College of Engineering, College of Chemistry and Chemical Engineering, College of Mathematics and Computer Science, School of Public Health, Medical College, Law School, Business School, School of Marxism, School of Continuing Education, School of International Education, Cheung Kong School of Journalism and Communication, College of Liberal Arts, and Cheung Kong School of Art and Design. International students are welcome to enroll in the undergraduate, master and doctoral programs of

STU.

STU is dedicated to becoming one of the fastest-growing universities in China by focusing on the development of four major disciplines, including marine science, chemistry, clinical medicine and mathematics, which were awarded the Top-tier University Development Funding Program of Guangdong. Endeavors will be made to further optimize the working environment, develop high-quality research platforms and foster international collaboration so that the standard of science and innovation can increase continuously.

### **A brief introduction of the discipline of Marine and Life Sciences**

The discipline of Marine and Life Sciences in STU is jointly offered by the Institute of Marine Sciences and Department of Biology, which have two important research platforms, including Guangdong Provincial Key Laboratory of Marine Biology as well as Guangdong Provincial Key Laboratory of Marine Disaster Prediction and Prevention. Laboratories equipped with state-of-the-art research facilities are located in the main campus and the marine research station in Nan'ao Island.

The discipline of Marine and Life Sciences in STU has been developed for more than 30 years. The academic staff members are well trained for both teaching and research. Many of them have worked in foreign academic institutes for many years, and their research publications are highly recognized and cited by researchers across the globe.

### **Research areas**

Applicants should major in one of the following disciplines:

**Marine Science:** marine biology, marine ecology, marine environment, aquaculture, global change biology, conservation biology, toxicology, ecological modelling, ecological remediation, marine chemistry, biogeochemical cycles, physical oceanography, marine geology, quaternary geology or land-ocean interactions in the coastal zone.

**Life Science:** microbiology, phycology, biochemistry and molecular biology, immunology and proteomics, probiotics, microbial fermentation, functional food, bioinformatics or genetic breeding.
