Key Responsibilities:

- Oversee curriculum planning, assessment, and accreditation.
- Coordinate scheduling, faculty assignments, and academic standards.
- Support student advising, recruitment, and retention efforts.
- Collaborate with university offices such as Registrar, Marketing, and COOPS+CAREERS.
- Teach up to 3 courses during the academic year and 2 in summer for additional pay.
- Assist with strategic planning, budgeting, and program communications.

The ideal candidate will have strong leadership skills, experience in academic administration, and a passion for student-centered education.

Minimum Requirements:

- Doctoral degree or equivalent terminal degree in Applied Math, Mathematics, Data Science, Computer Science (AI or ML), Education with a strong quantitative or computing focus, or a closely related field.
- Exceptional candidates with an ABD (All But Dissertation) status or a relevant Master's degree plus significant teaching or research experience will also be considered.
- 3+ years of experience in teaching, research, or programmatic contributions in academic, industry, or public sector settings.
- Comprehensive knowledge and understanding of higher education and its challenges and opportunities
- Experience in serving students, management, and leadership
- Record of clear research and scholarship agenda
- Record of commitment to inclusive excellence.

Preferred Requirements:

- Doctoral degree is preferred.
- Preferred Work Experience Required: 5–8 years of progressive responsibility in academic, research, or equivalent roles, including teaching, program development, or leadership. Experience in a tenure-track or teaching-intensive role is a plus but not required.
- Record of excellence in pedagogy and curriculum development
- Record of excellence in leadership and management
- Record of excellence in working in a collaborative environment

About Wentworth & the School of Computing and Data Science:

Wentworth is an institution known as a university of opportunity with a high return on investment for its graduates. Our mission is to empower, inspire, and innovate through experiential learning and a student-centered approach to education.

The School of Computing & Data Science consists of 30+ full-time faculty that offer undergraduate majors in Computer Science, Cybersecurity, IT, Data Science, and Applied Mathematics and graduate degrees in Computer Science, Data Science, and Cybersecurity. The school has teaching and research strengths in artificial intelligence, data science, cybersecurity, high-performance computing, mobile/web application development, stochastic processes, dynamical systems, financial math and modeling. In addition, members of the school have close collaborative relationships with faculty in sciences, humanities, and electrical and computer engineering, among others.

Our faculty comprises individuals from wide-ranging backgrounds and experiences, where collaboration is highly encouraged and supported, and our School has no department boundaries. Another point of pride is that our faculty members include those with significant industrial, consulting, entrepreneurial, and project management experience.

EEO/AA Policy
