Job Description

Aalto University is where science and art meet technology and business. We shape a sustainable future by making research breakthroughs in and across our disciplines, sparking the game changers of tomorrow and creating novel solutions to major global challenges. Our community is made up of 13 000 students, 400 professors and close to 4 500 other faculty and staff working on our dynamic campus in Espoo, Greater Helsinki, Finland. Diversity is part of who we are, and we actively work to ensure our community's diversity and inclusiveness. This is why we warmly encourage qualified candidates from all backgrounds to join our community.

The department of Information and Service Management has a strong focus on empirical studies and active cooperation with companies and prestigious universities. Most of our projects have both national and international partners, and the results of our research are targeted at top tier academic journals. The research is broadly divided into three disciplines: information systems science, management

science and SCM/logistics, with topics such as digital service development, service networks, behavioral decision making, and data science. Our department has more than 50 employees from all over the world with diverse backgrounds. More information about the department:

[url=http://information.aalto.fi/en/]http://information.aalto.fi/en/

We are now looking for an University lecturer to join us and support developing our growing portfolio of business-oriented cybersecurity, digitalization, and/or artificial intelligence study modules at the Department of Information and Service Management. The position is a permanent full-time lecturer position. The selected candidate is expected to start in January 2026 or as soon as possible.

Workplace is

located at Otaniemi campus in Espoo, Finland. The Aalto lecturer career system consists of four levels and in this recruitment you can be hired as a university teacher, a university lecturer, or a senior university lecturer, depending on your qualifications and experience. More information about Lecturer career system: [url=https://www.aalto.fi/en/teaching-and-learning/lecturer-career-system]https://www.aalto.fi/en/teaching-and-learning/lecturer-career-system

Your role and goals

The successful candidate will participate in planning, developing and delivering university level courses and study modules on various business-oriented topics related to cybersecurity, artificial intelligence and/or digitalization. The candidate should also have the ability to plan, develop, and teach study modules suitable for executive education and life wide learning programs. The successful candidate is expected to conduct research, supervise master's and bachelor's theses, and participate in preparing grant proposals for acquiring external research and teaching funding.

Your network and team

The successful candidate will join the Information Systems Science research group. The successful candidate also has the opportunity to collaborate with other researchers in the department on topics found here: [url=https://www.aalto.fi/en/department-of-information-and-service-management]https://www.aalto.fi/en/department-of-information-and-service-management.

Your experience and ambitions

We are looking for applicants who are completing or have completed their doctoral studies in information systems science, business information technology, or a closely related field. The applicants should have demonstrated their ability to teach university level courses and executive education courses, ideally on cybersecurity, artificial intelligence and/or digitalization. The applicants should have

demonstrated their

ability to conduct research independently and the potential or ability to publish in high-quality scholarly journals. The positions require fluent skills in the English language. Finnish proficiency is considered an advantage. The candidate should be familiar with modern pedagogical approaches (e.g. constructive learning, case-based learning, project based learning) and have the ability to effectively use digital tools and resources in teaching.

Applicants must possess a Doctorate (or be near completion of a doctoral degree) in information systems science, business information technology or a closely related field. Between 50-70% of the work duties are related to teaching, depending on the Lecturer career system level of the person selected for the position.

Salary and benefits

The salary is based on the salary system used at Aalto University and Aalto University provides health care and retirement benefits. Finland is a great and safe environment, offering many excellent state-subsidized services, including affordable day care and free schools, which are consistently ranked among the best in the world. For more information about living in Finland, please see:
