### **Position Summary**

The University at Buffalo, State University of New York, is seeking a highly motivated postdoctoral associate in genomics to join the Buck Lab in the **Department of Biochemistry**.

We are seeking a highly motivated and creative postdoctoral researcher to join our team investigating the mechanisms of transcription factor (TF) binding to nucleosomal DNA. This position is supported by a funded MIRA grant focused on understanding how TFs, particularly pioneer factors, engage with inaccessible chromatin regions and initiate gene regulation.

Job Duties Include:

- Design and execute experiments using Pioneer-seq and genomics assays (e.g., ChIP-seq, ChIP-exo, MNase-seq, HiC, RNA-seq)
- Analyze high-throughput sequencing data and contribute to computational modeling of TF binding

### **Outstanding Benefits Package**

Working at UB comes with benefits that exceed salary alone. There are personal rewards including comprehensive health and retirement plan options. We also focus on creating and sustaining a healthy mix of work, personal and academic pursuit - all in an effort to support your work-life effectiveness. We support your growth and development through our career coaching and training department and we qualify as a public service loan forgiveness organization. Learn more about our **benefit packages**.

## About The University at Buffalo

The University at Buffalo (UB) #ubuffalo is one of Americas leading public research universities and a flagship of the State University of New York system, recognized for our excellence and our impact. UB is a premier, research-intensive public university dedicated to academic excellence. Our research, creative activity and people positively impact the world. Like the city we call home, UB is distinguished by a culture of resilient optimism, resourceful thinking and pragmatic dreaming that enables us to reach others every day. Visit our website to learn more about the **University at Buffalo**.

As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicants race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.

#### Minimum Qualifications

- Ph.D. in Molecular Biology, Biochemistry, Genetics, or a related field.
- Experience with cell culture and genomic approaches.

#### **Preferred Qualifications**

- Strong background in transcriptional regulation, chromatin biology, or epigenetics.
- Familiarity with computational tools for genomic data analysis is a plus.
- Excellent communication skills and ability to work collaboratively.

### **Physical Demands**

Requires remaining in a stationary position, moving, and operating for prolonged periods, demonstrating stamina and coordination, along with the dexterity to operate small instruments such as pipettes. Must be able to position self (e.g., bend, stoop, and reach) and transport objects weighing up to 50 pounds.

# Salary Range

\$50,000 - \$65,000

#### **Special Instructions Summary**

- Cover letter should describe your research interests and career goals.
- Include two representative publications.
