institutions, including Nazarbayev University. Admission and progression are entirely merit-based and integrate professor-led teaching and research starting on day one as a freshman.

NU is an autonomous English language university with a mandate for world class research. International faculty from 60 countries and international students from 30 countries create a strong and ambitious scholarly community, willing to take leadership roles. The University offers doctoral, master's and bachelor's programs to over 6,100 students in Sciences and Humanities, Business, Education, Engineering and Digital Sciences, Medicine, Mining and Geosciences and Public Policy. The University hosts the most advanced scientific research laboratories in the region, with over 70 laboratories and a data center.

We're more than a novelty. NU is providing a higher education that prepares graduates for success in an age of globalization and technological disruption. Nazarbayev University, established in 2010, is the country's flagship academic institution with aspirations to become a global-level research university. This is the first university in Kazakhstan which is guided by the principles of autonomy and academic freedom.

Qualifications

The School of Mining and Geosciences (hereinafter – the SMG) is seeking outstanding researcher with an earned PhD degree in Geological Sciences, a proven research track record and teaching experience commensurate with appointment rank. Candidates with fracture experience and/or carbonate experience are particularly urged to apply to support an industry consortia-funded research project.

Early career carbonate geologists with research interests in structural geology with fracture experience are particularly urged to apply to support an industry consortia-funded research project.

Job Description

The successful candidate will be responsible for:

- (1) teaching undergraduate and/or graduate level courses, such as structural geology, geodynamics, geophysics, hydrogeology, and/or field geology,
- (2) establishing world-class research projects in partnership with the local industry and international partners, and
