**Job Description**

The [Paleoclimate Dynamics Lab](#) in the Department of Geology at the University at Buffalo is seeking applications for two **Postdoctoral Associates** to join NSF-funded interdisciplinary projects to explore Holocene climate and glacier change on Greenland and rapid climate change in Southeast Alaska, by combining paleoclimate proxies and models. The Postdoctoral Research Associates will be based in the Geology Department at the University at Buffalo and will collaborate closely with grant partners. UB is a global leader in [interdisciplinary polar climate research](#) and in [climate action](#). We will begin to review applications November 15, 2023.

Job duties and responsibilities include:

- Generate and interpret, using traditional frameworks and proxy system models, lipid biomarker and compound-specific stable isotope records from lakes in Alaska and Greenland.
- Along with the rest of the project team, the postdocs will improve understanding of the
