team in achieving research objectives and advancing our technological innovations.

### **Key Responsibilities:**

#### 1. PCB Design and Fabrication:

- Design and develop Printed Circuit Boards (PCB) according to project specifications.
- Liaise with vendors for PCB fabrication, ensuring quality and adherence to timelines.
- Perform troubleshooting and rectification of PCB issues.

#### 2. Testing Assistance:

- Assist in setting up and conducting a variety of tests on electronic components and systems.
- Collaborate with the research team to develop test procedures and documentation.
- Analyze test data and provide insightful feedback for improvements.

#### 3. Project Support:

- Support the project team in various stages of the research and development process.
- Ensure that project milestones are met and comply with quality standards.
- Assist in the preparation of reports and presentations for internal and external stakeholders.

#### 4. Administrative Duties:

- Coordinate and manage project-related paperwork and documentation.
- Schedule meetings and manage communication among team members.
- Oversee the maintenance and inventory of laboratory equipment and supplies.

### **Job Requirements:**

- Bachelor's degree in Electrical Engineering, Electronics, or a related field.
- Proven experience in PCB design and fabrication.
- Familiarity with testing equipment and methodologies.
- Strong analytical and problem-solving skills.
- Excellent organizational and administrative abilities.
- Ability to work collaboratively in a team environment.
- Proficiency in relevant software tools (e.g., CAD, PCB, FPGA design software).
- Good communication skills, both written and verbal.
