programs in organic and inorganic chemistry, physical chemistry, chemical engineering, and bioengineering. We aim to nurture future-ready researchers with the ability to tackle new challenges in chemicals manufacturing, healthcare, energy, food, and other important sectors.

This position is responsible for aiding the development of new synthetic methods in the labs of Asst Prof Phillip Grant, which aim to improve the efficiency of organic synthesis.

Key Responsibilities:

- Synthetic research in organic synthesis of small molecule drug-like compounds
- Characterisation of organic compounds
- Development of new methods to synthesise drug-like compounds
- Maintenance of key instruments
- Contribution to lab duties; e.g., purchase of chemicals
- Drafting reports and papers

Job Requirements:

- A PhD in organic chemistry.
- Prior experience in synthetic methods development and/or target oriented synthesis.
- A good command of writing and speaking in English is preferred.
-

Research Fellow (Organic Synthesis)
