Job Description

Professor Qing Lin in the [Department of Chemistry](#) seeks a **Postdoctoral Associate** to develop novel bioorthogonal chemistries as tools for biomedical research. The successful candidate is expected to have a strong background in synthetic organic chemistry, medicinal chemistry, peptide chemistry, and/or chemical biology. The candidate shall be self-motivated and capable of carrying out the project independently.

Duties may include, but are not limited to:

- Organize and implement research plans
- Develop methods or research that incorporate highly specialized training in a specific specialty
- Conduct tests procedures and engage in data collection
- Analyze, evaluate, and present findings in professional journals and at professional conferences and meetings
