Job Description

The [Department of Geology](#), University at Buffalo, The State University of New York seeks applications from researchers who have exceptional track records in the broad area of Surface Hydrology. Two positions are available for any rank, with an expectation to bring an established research program.

Areas of possible emphasis are:

- (1) Cold-Regions Hydrology. Examination of the rapidly thawing cold regions of the world; local and global environmental risks through hydrologic and coupled hydro-biogeochemical change; and
- (2) Global Hydrology. Employing advanced technologies, including remote sensing, modeling, and data analyses to predict flood and drought risks and global challenges to the adequate provision of clean

water.

Selected candidates will teach courses at the graduate and undergraduate levels, mentor graduate students, and maintain an active externally funded research program that will complement existing Departmental strengths in water and the environment, polar climate-change, volcanology and geodynamics. Additionally, the selected candidates could align their research with an expanding focus of UB's Center for Geological and Climate Hazards, which facilitates interdisciplinary research across campus and builds on recent and ongoing hires in natural hazards. Inquiries should be made to Prof. Jason Briner (jbriner@buffalo.edu).

Outstanding Benefits Package

Working at UB comes with benefits that exceed salary alone. There are personal rewards including comprehensive health and retirement plan options. We also focus on creating and sustaining a healthy mix of work, personal and academic pursuit - all in an effort to support your work-life effectiveness. Visit our benefits website to learn about our [benefit packages](#).
