Job Description

We are searching for a candidate to join our interdisciplinary research team and make significant contributions to cutting-edge research in NLP and its downstream application.

To be considered for this position, you should hold a Ph.D. in Computer Science, Data Science, or a related field. Your expertise should include a strong background in NLP research, focusing on large language models' pre-training and fine-tuning. In addition, excellent communication and writing skills are essential.

As a member of our research team, you will collaborate with researchers in different disciplines, conduct impactful research in NLP and AI within specific domains, disseminate research findings, and provide guidance and mentorship to students and other research participants. Furthermore, you will engage in outreach activities aimed at inspiring K-12 students and teachers in the field of NLP and AI.

If you are excited about making a significant contribution to our impactful project, we invite you to submit your application with a cover letter, your CV, and the contact information of three references
